Publishing & Practice Notice

Copyright © 2026 Samantha Roeloffze. All rights reserved. No part of this publication may be reproduced, stored, or distributed without written permission, except for brief quotations used in reviews or professional discussion.

This manual presents complementary bioresonance and NLS practice concepts for trained practitioners. It is educational material—not a diagnostic instrument, medical treatment guide, or substitute for licensed medical care. Device findings and energetic markers must not be represented as validated laboratory results or definitive diagnoses.

Always work within your legal scope of practice. Clients with acute symptoms, serious illness, pregnancy, medication concerns, psychiatric crisis, or complex pediatric needs require appropriate medical oversight. Do not advise clients to stop or alter prescribed medication, delay investigations, or replace emergency or specialist care.

Product names, device terms, etalon labels, and software functions vary by manufacturer and version. Practitioners should follow the instructions, contraindications, and safety guidance supplied with their own equipment.

Editorial note

The manuscript has been reorganized for clearer navigation and consistent protocol use. Repeated title pages and duplicate index material have been removed; terminology, capitalization, headings, tables, and practitioner cautions have been standardized while preserving the source manual's protocol content.

Introduction — Scope, Safety and Use of This Manual

The Future of Energetic Medicine and Systemic Support

Welcome to **The Energetic Blueprint**, a comprehensive professional guide that transcends conventional energetic assessment to provide precise, actionable protocols for complex, chronic, and degenerative health conditions. This manual is not merely a collection of settings; it is a **foundational reference database** built on the principles of quantum physics, bioterrain integrity, and functional neurobiology.

For decades, we have been limited by models that separate the body into distinct, siloed systems. This Blueprint recognizes and addresses the fundamental truth: **health is an integrated flow state.** Chronic disease is simply a predictable pattern of energetic dysregulation in key control centers.

The protocols contained within are meticulously structured into cohesive chapters to equip practitioners with the advanced tools necessary to navigate the most challenging client cases:

- **Foundational Protocols (Detox, Lymphatics, Inflammation):** These sections provide the bedrock for all systemic support, ensuring clearance pathways are open and inflammation is resolved before any deep-level repair can begin.
- **The Neuro-Endocrine Masterwork:** Covering **Nervous System, Brain Health, and Addiction & Metabolic** protocols, we address the critical interplay between mood, cognitive function, HPA axis stability, and metabolic disorders like hypoglycemia and chronic pain.
- Immunity, Gene Support & Biologics: This advanced section tackles modern-day stressors, including Post-Infectious Stress Detoxification, Autoimmune Support, and Gene Integrity, providing crucial energetic strategies for cellular resilience against novel molecular challenges.
- **Gastrointestinal & Digestive Harmony:** From **SIBO and IBS** to **Intestinal Parasites**, this chapter focuses on restoring the Gut-Immune Axis, which is the energetic epicenter of over 70% of systemic health issues.
- **Specialized and Life Support Protocols:** Addressing conditions from **Chronic Psoriasis and Deep Tissue Repair** to **Critical Care Support** and **Advanced Hormonal Optimization** (Men's and Women's Health), these protocols are the precision tools for intricate, individual needs.
- **The Pediatric Core:** Finally, the **Digestive and Immunity Support in Pediatrics** section offers targeted, gentle protocols vital for setting the energetic foundation for healthy development in children, ensuring immune, gut, and neurological systems are supported from the start.

The Energetic Blueprint is your essential roadmap to understanding and mastering the complex, subtle language of chronic illness. It is designed to move your practice from symptom management to **sustainable energetic restoration**, supporting the client's innate blueprint for health and vitality.

Part I — Pediatric and Developmental Support

Mapping Guide

Understanding pediatric body systems and developmental stages for age-appropriate NLS scanning and treatment protocols.

Pediatric NLS Database Mapping Table

Condition	Primary Body System(s)	Scan Area / NLS Focus Points	Etalons to Test
Recurrent Ear Infections (Otitis Media)	Ear / Auditory System / Immune System	Middle ear, Eustachian tube, cochlea, auditory nerve pathways	Lymphoid tissue activity (adenoids, tonsils), T/B cells, IgA, cytokines
Tonsillitis & Adenoiditis	Throat / Lymphatic / Immune System	Tonsils, adenoids, pharyngeal wall	Lymphoid tissue, MALT, T/B cell activity, cytokine profile
Childhood Asthma	Respiratory System / Immune System	Bronchi, bronchioles, alveoli, upper airway mucosa	IgE/IgA response, cytokines (IL-4, IL-5, IL-13), lung parenchyma
Allergic Rhinitis (Hay Fever)	Respiratory / Immune System	Nasal mucosa, sinuses, bronchi (if reactive)	IgE, histamine, eosinophil activity
Eczema (Atopic Dermatitis)	Skin / Immune System	Epidermis, dermis, sebaceous and sweat glands	Langerhans cells, cytokines (IL-2, IL-6, TNF-α), histamine markers
Juvenile Rheumatoid Arthritis	Musculoskeletal / Immune System	Synovial joints, cartilage, bones, skeletal muscles	ANA/RF, cytokines (IL-1, IL-6, TNF-α), inflammatory markers
Kawasaki Disease	Cardiovascular / Immune System / Skin / Mucous Membranes	Heart (coronary arteries, valves), peripheral arteries/veins, skin, oral and conjunctival mucosa, lymph nodes	CRP, ESR, cytokines, vascular tone, neural reflex markers, immune cell activity
Autism Spectrum Disorder (ASD)	Nervous System / Brain	Cerebral cortex, limbic system, cerebellum	Neurotransmitters (dopamine, serotonin, GABA), glial cell function, neural connectivity markers
